# UNEET: Professional integration of NW European Young Adults into the Hotel and Restaurant fields

## What challenge or problem are you addressing? What is the need for the project?

UNEET aims to tackle unemployment of young populations, particularly of NEET (not in education, employment or training) in NWE regions while responding to the recruitment difficulties faced by companies in the hotel and restaurant fields. The project aims to contribute to support the expansion of tourism in those NWE regions where it represents a priority and to enhance working synergies among companies, civil society organizations and local public authorities..

## Objective of the project: What your project wants to achieve/change

To match the recruitment needs and the existing supply in the hotel and restaurant field by supporting the professional integration and transnational mobility of young adults in NWE regions.

## Why do you need transnational cooperation?

Joint action is essential to eradicate unemployment of young adults in NWE regions, and to improve an economic sector in constant need for foreign labour and that struggles with recruitment. The hotel and restaurant fields offer a vast range of occupations accessible to entry-level job seekers, and which are at the centre of the economic development strategies of NWE regions.

## What kind or partners are you looking for?

- Organisations supporting young adults' professional integration;
- Employment agencies;
- Transnational labour mobility organisations;
- Vocational and training providers;
- Experts and/or researchers on professional integration and/or transnational mobility;
- Representatives of the private sector;
- Local public authorities
