

IAN KILGALLON

GAS NETWORKS IRELAND WILL DEVELOP A PLANT USING WILLOW SUBSTRATE AND LOOK TO TEST AND INJECT THE RENEWABLE GAS INTO THEIR MAIN PIPELINE FOR NATIONAL USE

Ian is a Business Development and Innovation Manager at Gas Networks Ireland

What will Gas Networks Ireland do?

- GNI is developing renewable gas in the heating, transport and electricity generation sectors; and to influence energy policy by positioning gas as the fuel to transition Ireland to a low carbon economy.
- GNI works closely with a number of companies to develop the generation of renewable gas in Ireland.
- GNI's main role will be to develop with its partners an optimum AD plant utilising Willow substrate and look to test and inject the renewable gas into their main pipeline for national use.
