

PETER HOLLY

HELICON WILL ASSESS AND ANALYSE THE CHEMISTRY OF SALICIN AND POTENTIAL MEDICAL INDICATIONS

Peter is a Chartered Engineer at Helicon

What will Helicon do?

- Helicon will assess and analyse the research on the chemistry of salicin and potential medical indications for salicin with the objective of developing a commercially viable process for the industrial manufacture of salicin-based formulations.
- The final report will present a commercially viable proposal with plant/technology design for the production of the proposed biopharma product with financial breakdown for a GMP production line.
