# Objective

- Test, Implement and promote pre-cast L-wall (Moselle / France).
- Demonstrate recycled concrete mechanical properties and durability.
- The pilot represents a first application of using recycled aggregates (100%) and cement in structural precast elements.

# Project description

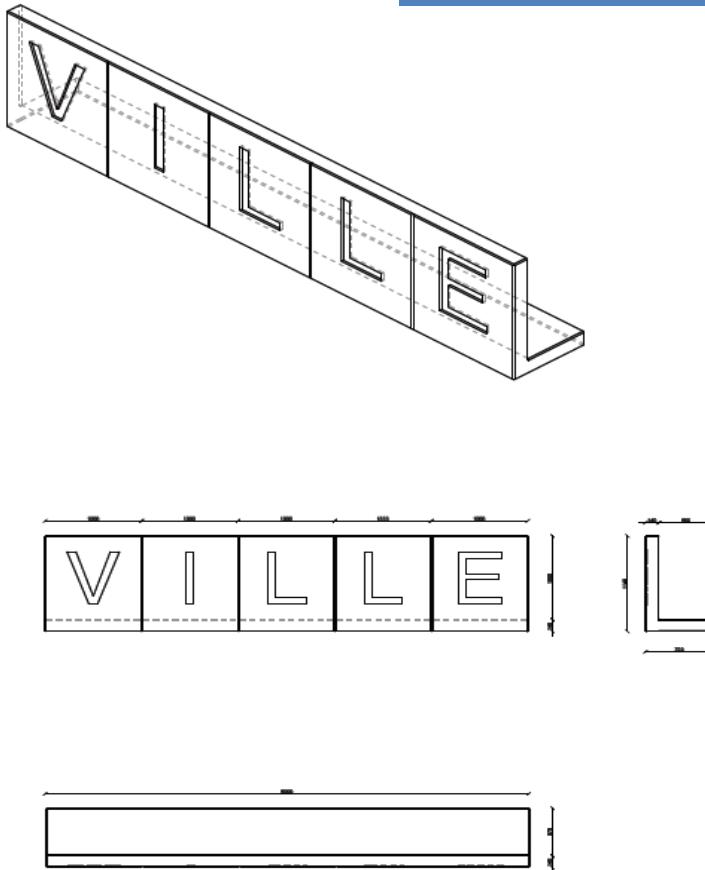

Length : 27 m  
High : 1,1 m

Rest area "Porte de France" (highway A31)

# On site implementation

- 5 elements of 5m to 6m each.
- Pouring of leg on site

# Final result

## Hurdles to overcome for further development

- ✓ Lack of guarantee for final user : economic, logistical, aesthetic or structural.
- ✓ Anticipation of the use of recycled concrete in the technical specification of a public tender.
