

## CNAP

### Dismantling interior elements of an office building for off-site reuse

*About* - A look back at a dismantling operation dealing with interior finishings of an office building. In order to allow their dismantling for reuse, an inventory and a collection of the market's marks of interest is carried out, so that reuse can be included in the demolition works contract.

*Challenge* - Which batches of materials are of interest to the reuse market ? How to set a reuse target in the works contract ?

*Materials involved* – technical floors, modular partitions, insulation panels, interior doors, carpet tiles, sanitary facilities...
