

Port Chemin Vert

1% reuse

About – As part of a new social housing construction project, the project owner and its architect aim to dedicate 1% of the total works budget to the supply of reclaimed materials.

Challenge – Study the possible ways to reach the objective of 1% reuse - identify local sources of supply - establish a mediation between the architect and the local reclaim dealers.

Materials involved – divers

Aubervilliers (93) - FR - 2021 – public procurement

– Surface : 4 437 sq.m – FCRBE coordinator :

Bellastock – Project manager: **Immobilière 3F** –

architect : **ITAR** – local authority in charge of planning : **Plaine Commune Développement**
