

## BioBase4SME WORKSHOP

# Technology transfer in bioeconomy

Datum: Wednesday 08 March 2017

Venue: RWI4-Building, Völklinger Str. 4, 40219 Düsseldorf, Germany

On Wednesday, 08 March 2017, CLIB will present its current project BioBase4SME with a forum under the title "Technology transfer in bioeconomy - bringing innovative methods from bench to market".

## TOPICS

This forum event aims to introduce innovative approaches in technology transfer for the bioeconomy, taking into account the specific requirements of life sciences. Therefore the forum will compare different approaches in Germany and the Netherlands and will not only focus on the transfer from lab to industry, but will also take a broader view on open innovation approaches to create favorable conditions to stimulate collaboration between companies.

This forum event is organised through the Interreg NWE project BioBase4SME which aims to further support the development of the biobased economy in North West Europe. In order to achieve this, BioBase4SME offers training, innovation biocamps, workshops, and innovation coupons worth up to 100.000 EUR. Please click here to access the project webpage

## TARGET AUDIENCE

Entrepreneurs, industry, small and medium sized enterprises, academia, infrastructure interested in supporting technology transfer on different levels.
