A custom-made online diary for clients in blended care

Philippe Bocklandt & Herwig Claeys eMEN conference Mechelen February 2017

1. What is it?

A flexible online self-monitoring tool for blended mental health care

- Can be custom-made in every aspect, for (almost) any client
- By various aid workers: therapists, social workers, nurses, teachers,...
- In dialogue between aid worker and client
- In the 'language' of the client & in accordance with his capacities
- For any theme (mental problems, behaviours, positive goals,...)
- For diagnostic purposes or as part of a therapeutic process
- Can be edited along the way
- No software installation (online application)
- Can be used by participants on any device
 - + app version

A few examples

Mood & pleasant activities

Coping with bullying

Job application & medication use

Alcohol use

Self harm

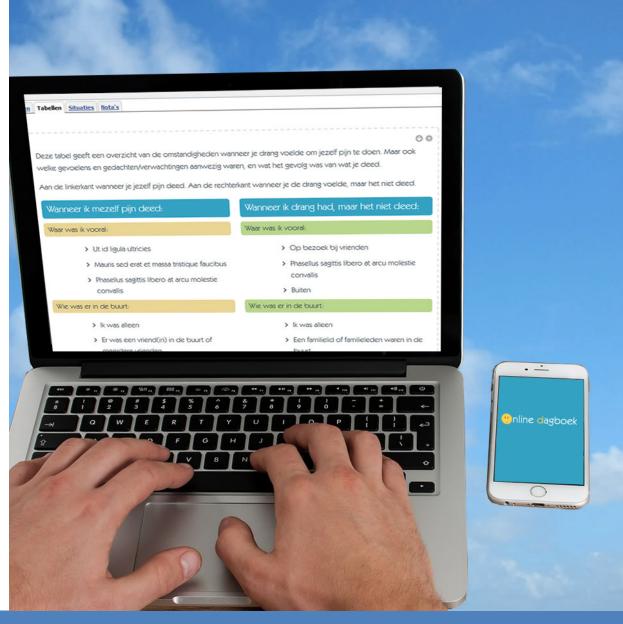

Mood & coping at work

2. From the perspective of the aid worker

Working with a diary

- Deciding why (exploring, diagnostic, support, therapy, positive goals,...)
- Discussing & planning with client
- Building a diary with the diary editor application
 - from scratch
 - o using & editing:
 - a prebuild template (40 available)
 - a template you've used before
 - a template from a colleague
- Motivating the client
- Follow-up

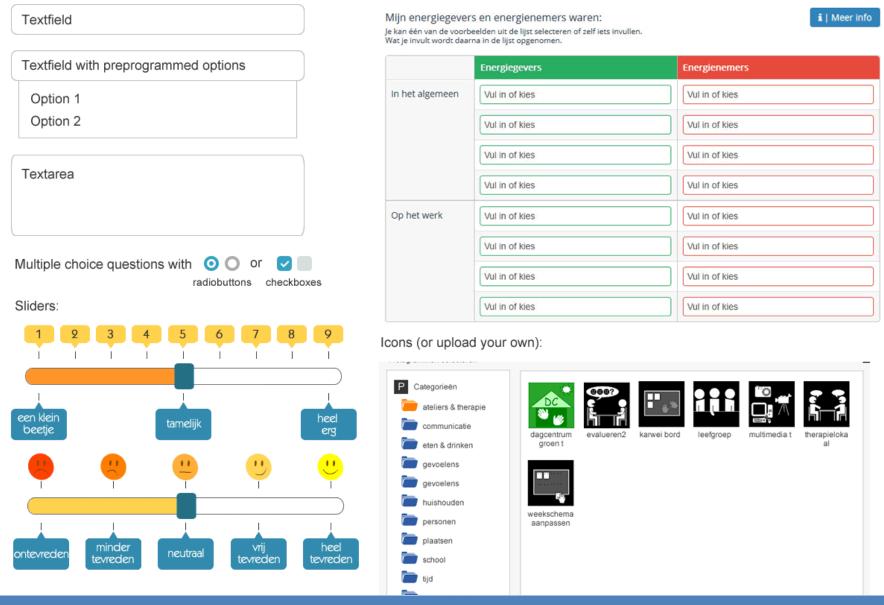

The diary editor

Diary editor elements

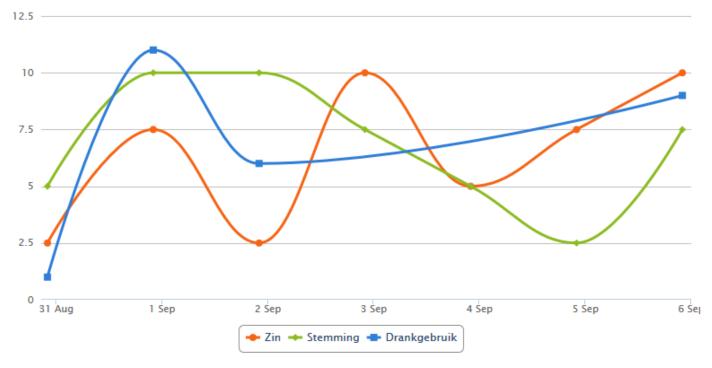

The diary editor: charts, tables, lists,...

<u>Dagboek</u> Weekgrafieken <u>Maandgrafieken</u> <u>Tabellen</u> <u>Nota's</u>

(C)

In onderstaande grafiek wordt aangegeven hoeveel zin je had om te drinken, hoeveel je dronk en hoe je stemming was gedurende een week.

Je kan de lijnen van de grafiek onzichtbaar/zichtbaar maken door op de naam te klikken.

Extra functionality

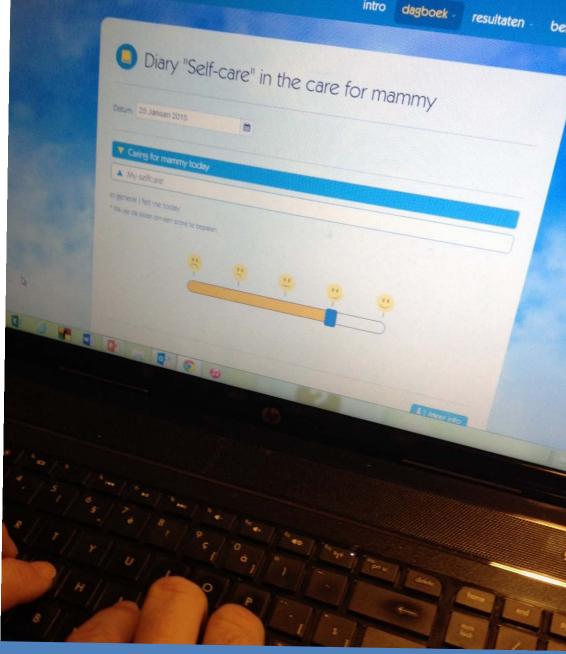

- Results of registrations can be downloaded (pdf) by clients & aid workers
- Can be used by teams:
 - Templates can be shared between team members
 - Templates can be shared between teams
 - Different team members can have access to a diary of a client (if client has given permission)
- Adjustable reminders by e-mail
- Message box for online communication between client & aid worker

3. From the perspective of the client

A case

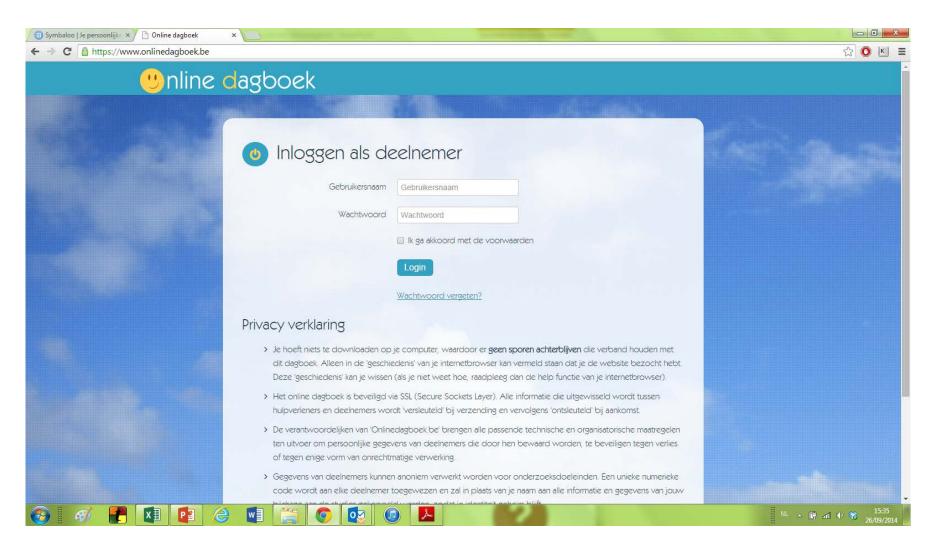

- Sara (46 years old) takes care off her demented mother who lives alone.
- Caring for her mother is a heavy task, but also gives her satisfaction.
- Both, her network and she, are aware of the complexity of Sara's situation. Some moments, caring for her mother takes too much energy.
- The counsellor and Sara agree that she will use an online diary to explore her caring capacities and the way she manages to respect her limitations.

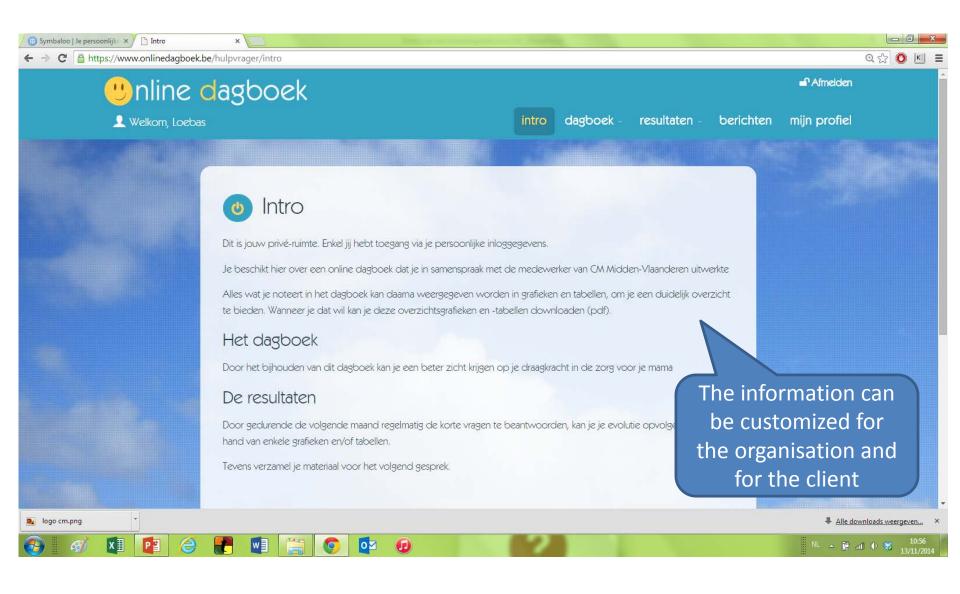

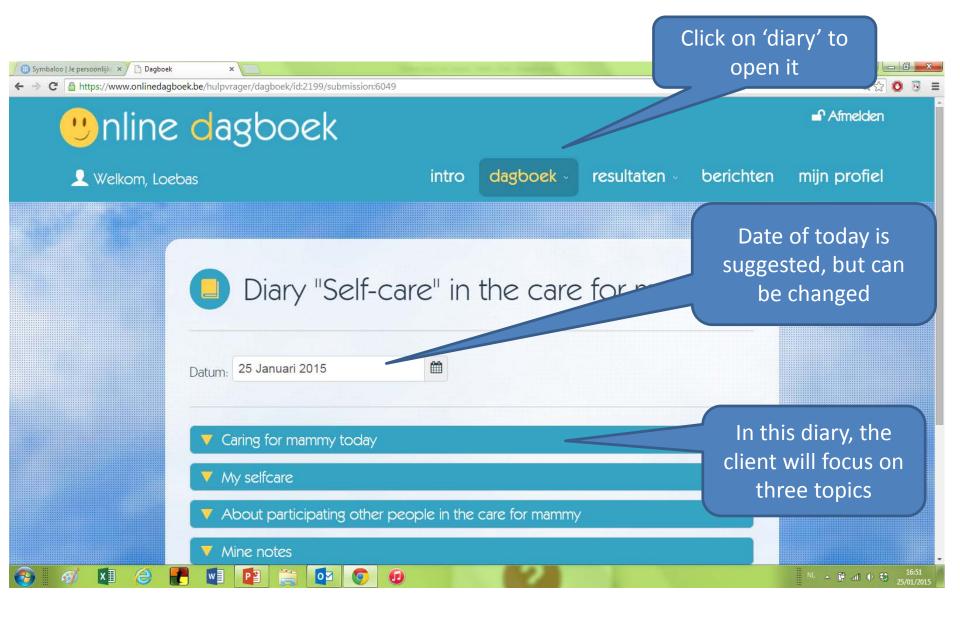

Secured login for the client

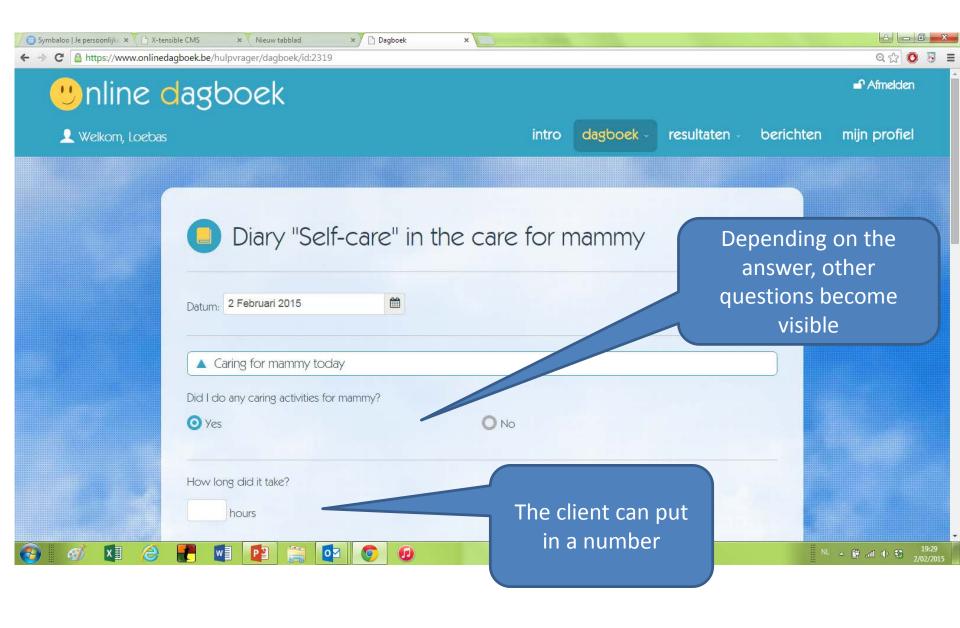

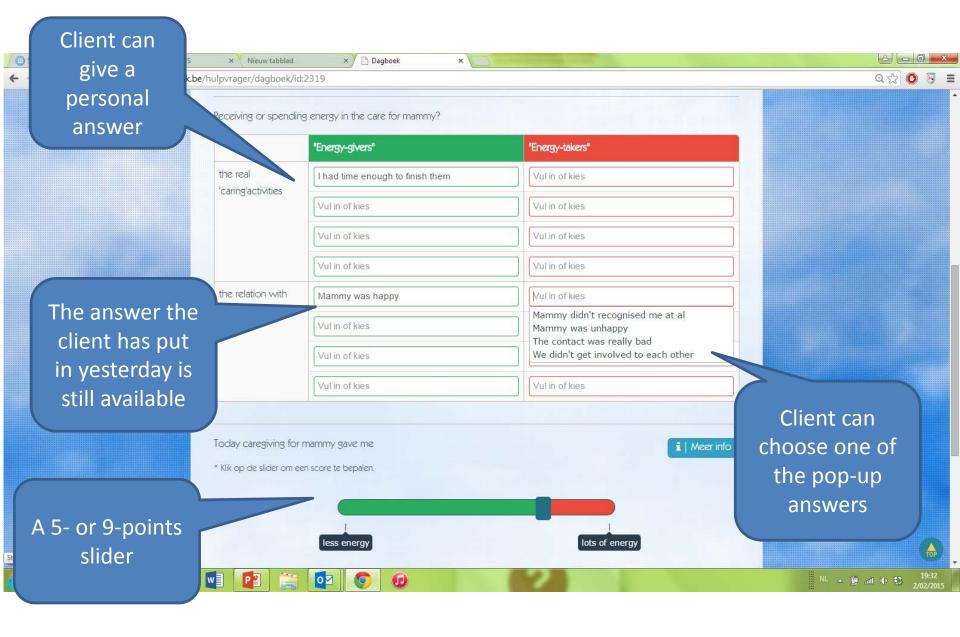

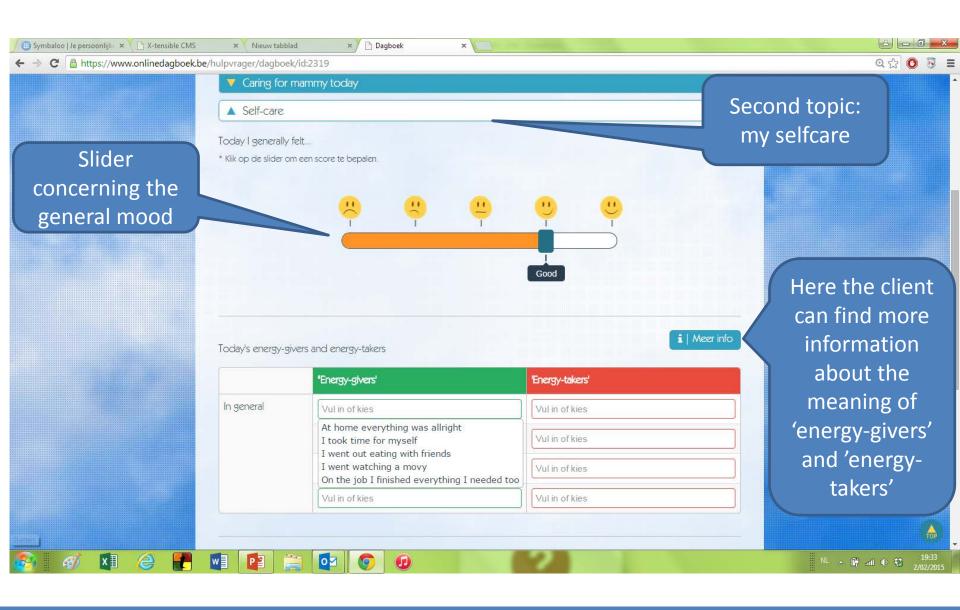

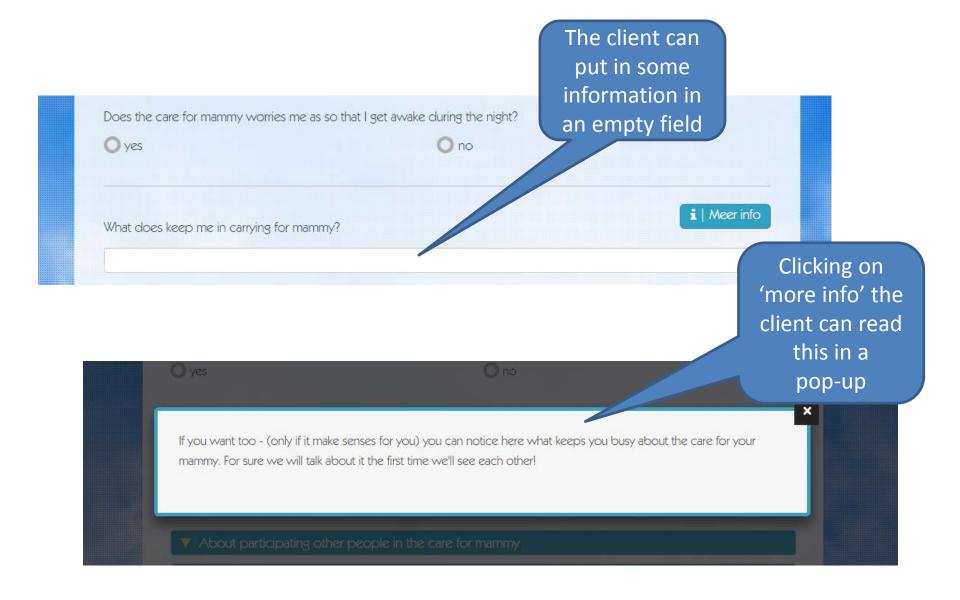

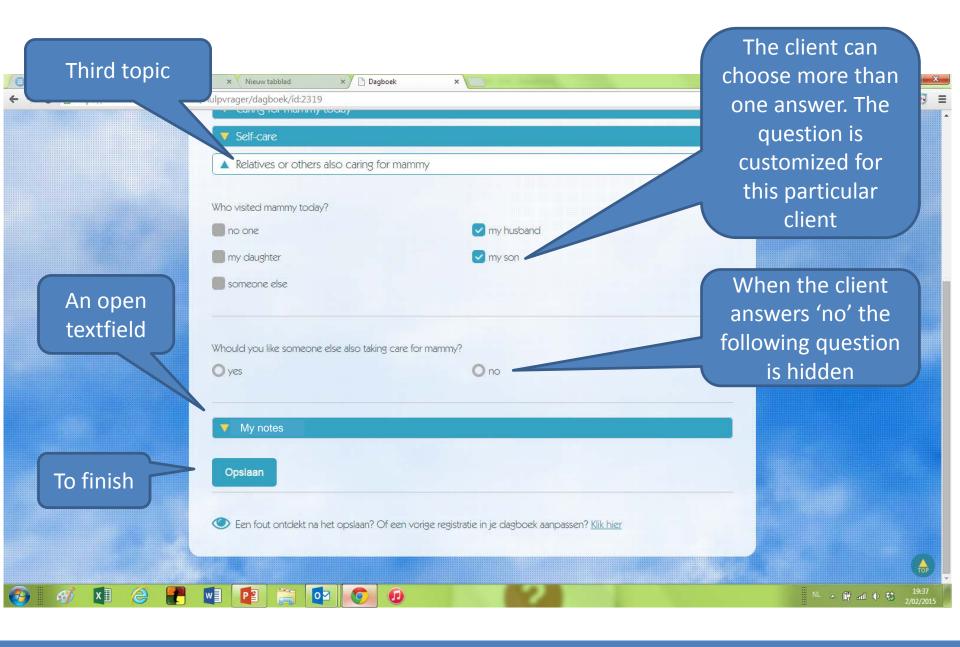

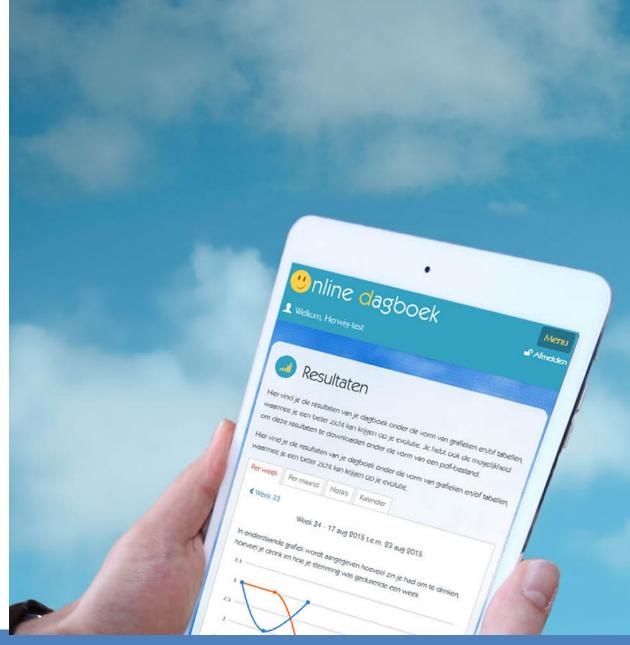

Cliënt can see his own results in his diary

4. A tool in development

Practical research

- 220 counselors have tested the online diary with 620 clients
- in 46 organizations in: health care, youth care, education, primary care, social services, day care, ...
- The results of their experiences =
 - Online diary has an added value for aid workers and clients
 - There's a learning curve for aid workers when not accustomed to:
 self-monitoring, computers or blended care
 - User friendly for clients
 - A guide: how, when, where to use an online diary?
 - Technical manual for aid workers
