

HELLO

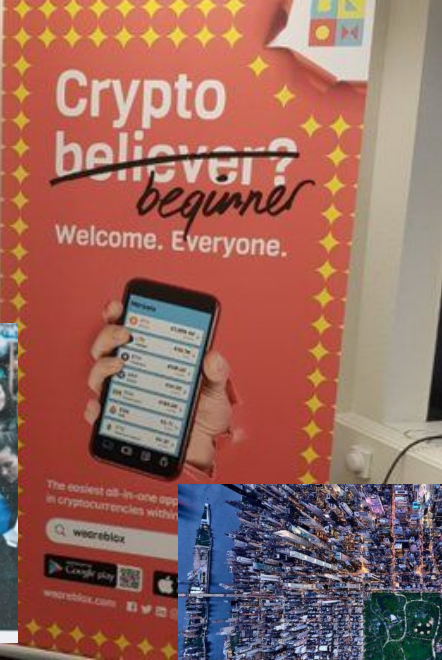

my name is

VINCE? ;-)

Transformation is a concept dear to my heart, here's why!

Global Ecosystem For Reusable Material Resources

A Unique Crossover

"The NASDAQ/Binance/Coinbase
of Reusable Material Assets"

Brick

Concrete

Steel

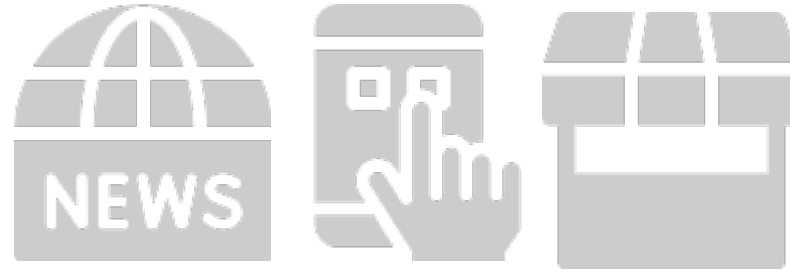

Timber

Glass

Roof Tile

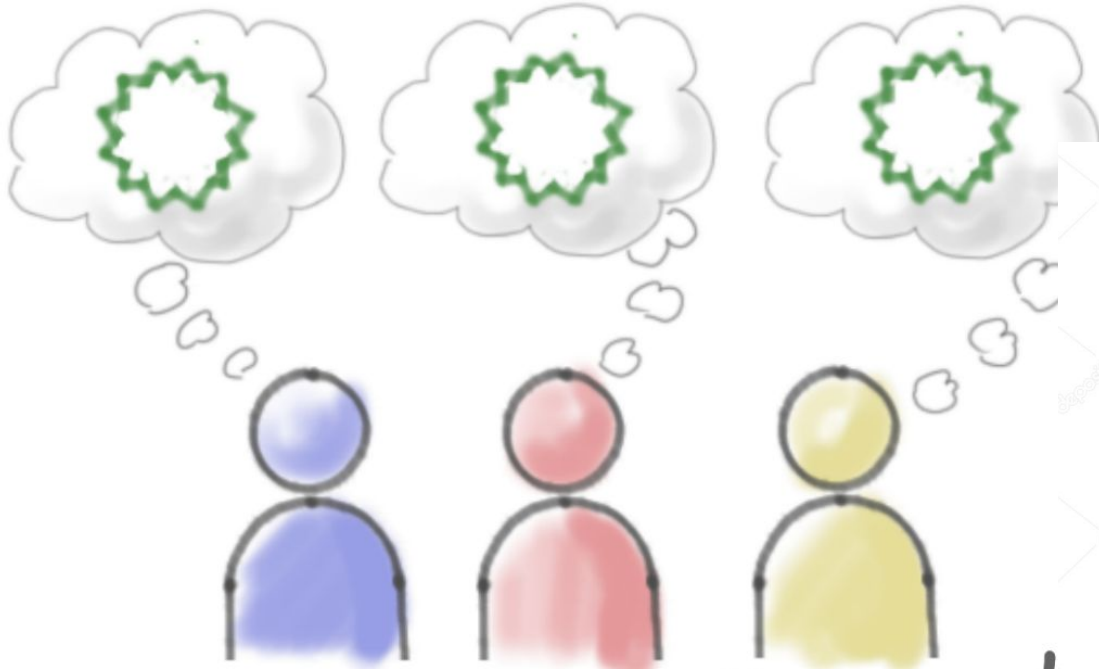

Each index token represents a **stable coin**,
backed by **physical tangible reusable materials**,
as a **prepayment for the actual material** in the future upon disassembly.

Brick	Concrete	Steel	Timber	Glass	Roof Tile
€ 495.23 ▲ (+13%)	€ 242.48 ▼ (-1%)	€ 15,711.96 ▲ (+37%)	€ 1,527.75 ▲ (+89%)	€ 2,339.54 ▼ (-12%)	€ 884.21 ▼ (-14%)

Trade against: **\$USD / €EUR / ¥CNY / ₪BTC**

Like: **Petro\$ / BNB** for Materials

I'm glad we all agree!

~ **2600B EUR**

Real Estate in NL

Rights Assets

- Certified “Green” instrument, to tap into ESG committed capital
- Global exposure to circular reusable materials secured by Institutional-grade Properties.
- Monthly cashflow (10%+ annually)
- Always liquid (No Lock-up)

Forward	Futures	S&LB (3.5-12.5%pa)	Alternative Mortgage (Up to 100% LTV)	Standardized SPV Framework	Acquisition
---------	---------	-----------------------	---	-------------------------------	-------------

- Access syndicated global capital
- Additional cashflow from global trading exposure
- Alternative income & budget to improve the Sustainability & Circularity of the property.
- (Temporary) Fractional Sale for Next Deal
- Clear exit strategy

MAECONOMY.ORG

Global Material Resource Reserves Digital Transparency & Availability

1. We give each **reusable material** digital legal “rails/handles” through **certification**.
This allows us to define & contract a **sustainable & circular deconstruction and local reuse** strategy.

2. Which makes future CO2 offset & energy savings tangible & manageable.

3. We provide an **instrument** to turn real estate into **qualified sustainable & circular real estate**.

MATERIALS.COM

24/7 Global Financial Markets around Resources

1. We give each **reusable material** digital financial “rails/handles” through **tokenization**.
This allows us to finance & incentivize a sustainable & circular deconstruction and local reuse strategy to be more attractive than new materials.

Lease

2. We empower property owners to sell & lease back (stream) their materials.
This turns **illiquid real estate into a liquid market**.
3. We provide an instrument to investors to become guardians & hedge market risks of materials.
4. We empower polluters to offset their CO2.
5. We empower ESG / UN-SDG focused investors to fulfill their public commitments.
6. We empower urban mining companies to contract future availability of materials.

Thank you!

Let's make it happen together & continue the conversation:
