REGENERATIS

European Regional Development Fund

Co-funded by the Walloon region

Partner:

University of Liège (Belgium)

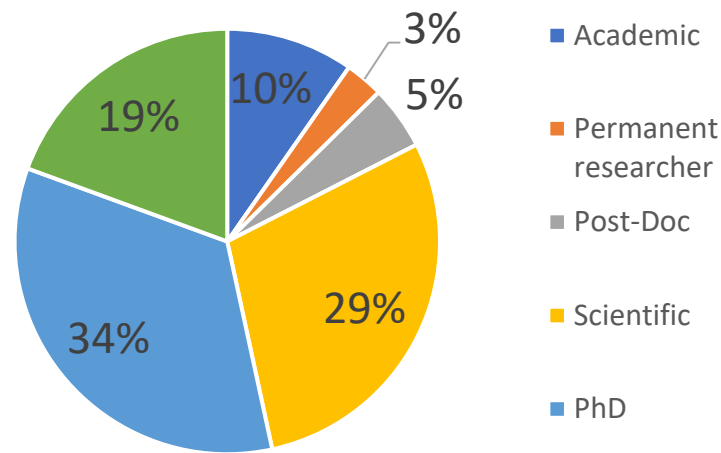

LIÈGE université
Urban & Environmental
Engineering

Department UEE/ArGEnCo

Over 200 staff with a focus in Education and Research on:

- **Building design, structures and transport network**
- **Materials and efficient management of resources**
- **Risks and environmental engineering**
- **Human activities and built environment**

Research divisions

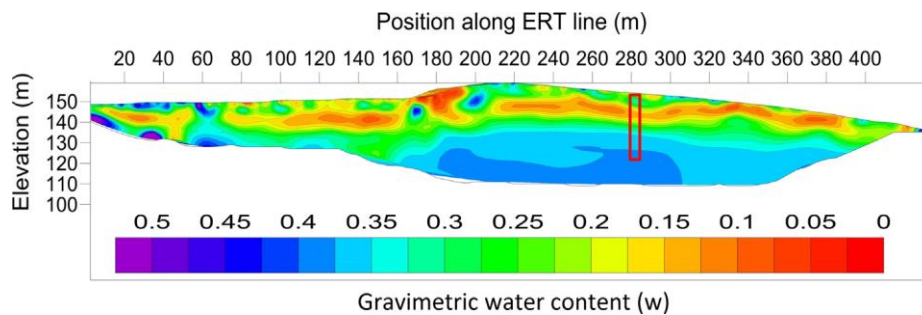

5 research divisions

- GEO³ – Geotechnology, Hydrogeology, Geophysics

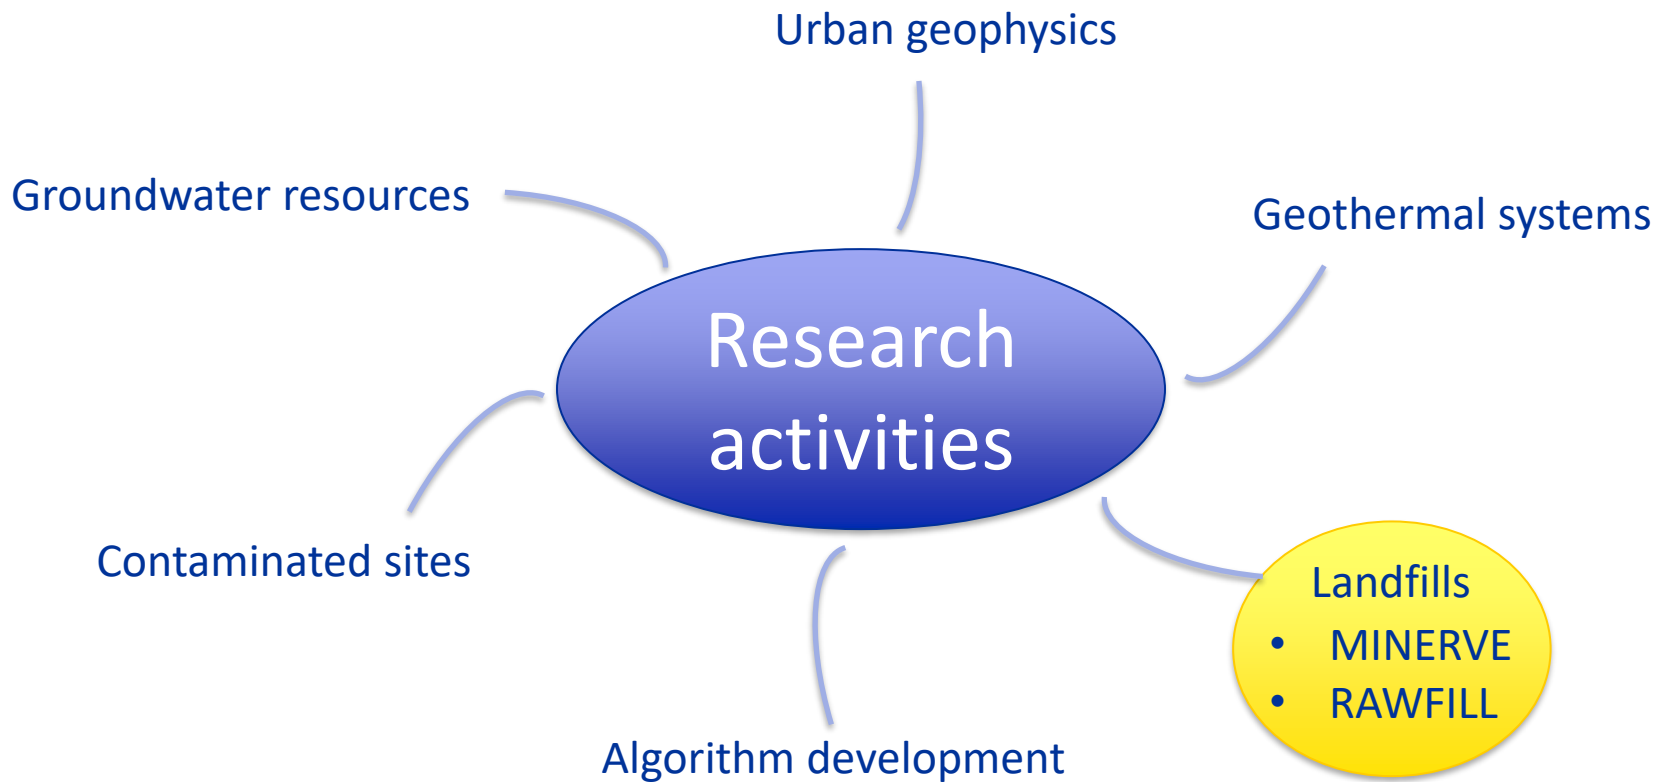

GEO³ – Geotechnics, Hydrogeology & Environmental Geology, Applied Geophysics

Research topics

- Geophysical imaging and inverse modeling

The Applied Geophysics research unit

Our tasks within REGENERATIS

WP C

- Publications and training material
- Participation at workshops, conferences, fairs...
- Demonstration on pilot sites

WP M

- General project management
- Technical coordination
- Networking with stakeholders

WP T1

- Identification, selection & evaluation of innovative techniques

Our tasks within REGENERATIS

WP T3 (WP leader)

- Use of historical studies & geophysical methods to demonstrate relevance of REGENERATIS approach

WP I1 - I3

- Prior information collection
- Local on-site investigation
- Guidelines for replication on other sites

WP LT

- Dissemination of the project results
