Interreg North-West Europe NWE-REGENERATIS

European Regional Development Fund

THEMATIC PRIORITY

REGENERATIon of Past Metallurgical Sites and Deposits through innovative circularity for raw materials

Project objectives:

- Increase the reuse of raw materials from past metallurgical sites and deposits
- Evaluate the feasibility and economic potential for raw material recovery and site remediation using innovative Artificial Intelligence Tools
- Provide knowledge and tools to screen past metallurgical sites and deposits
- Recovery of valuable materials
- Jobs creation

RENICRRAN

REGENERATIS Methodology for Innovative Circularity to Recover RAw Materials from PMSD

NWE-REGENERATIS, with REMICRRAM offers an accurate perspective of a PMSD, which is essential for developing a sustainable development of the project on it
