What if every city was made from reused materials?

In north-western Europe today, only 1% of building materials are reused after their initial application. Yet research, particularly that conducted by the FCRBE project, shows that reuse can be applied to a large number of projects and materials. We invite you to close your eyes and imagine what a city made from reused materials might look like....

**WELCOME
TO REUSE
CITY!**

**Does it sound
complicated,
unaffordable
or unreliable?**

Let us show you
what it could look like!
