BioBase4SME WORKSHOP

Biodegradable plastics... When and where?

Date: Wednesday 3rd October 2018

Location: Avans Hogeschool, Lovensdijkstraat 61-63, 4818 AJ Breda, the Netherlands

Some people hope that biodegradable plastics will be the solution for a lot of our problems; plastic soup, littering beside the road, having to separate household waste, etc. But what if it is not? Some parties in the value chain reject biodegradable plastics as a whole. It is time to take stock: when and where should we use biodegradable plastics?

TOPICS

The day will start with a discussion about contemporary biodegradable plastics; when are they a benefit and when are they not. Next, companies that produce biodegradable plastics will demonstrate their products and offer you the chance to interact with them. You will also be able to receive a critical opinion of your idea about applying biodegradability. We look forward to meeting you on 3 October!

For more information please contact Roel Koevoets: r.koevoets@rewin.nl

TARGET AUDIENCE

Stakeholders in 'plastics', who are interested in the most recent developments in biodegradable plastics. Producers, buyers and everything in between.
