

## Accelerating Condominium Energy Retrofitting

### ACE -Retrofitting Conference

How local and national governments can facilitate energy efficiency improvements in older buildings

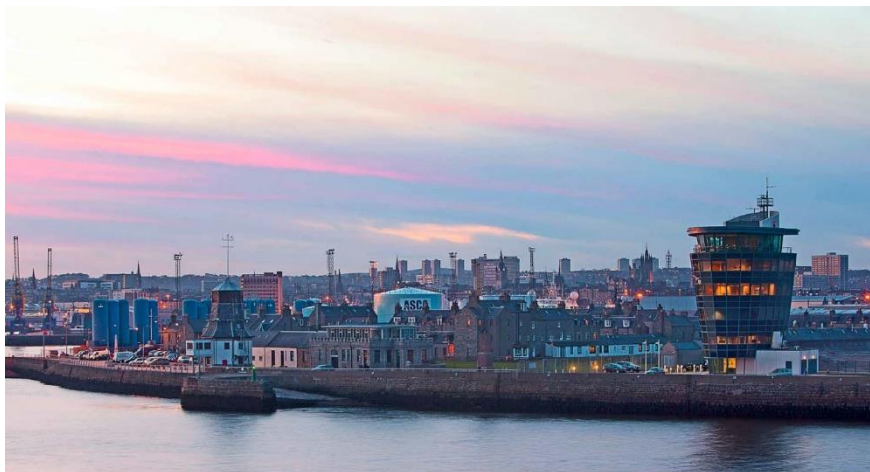

Thursday 16 May 2019

*Target audience: Local Authorities, Housing Associations*

*Location: Marischal College, Broad Street, Aberdeen, AB10 1AB*

Many buildings in North West Europe are still energy inefficient and in need of deep renovation. If action is not taken it will lock local authorities into a high carbon-footprint future. The Interreg [ACE Retrofitting \(Accelerating Condominium Energy Retrofitting\) project](#) will help flats and apartments to overcome the legal, social and financial barriers of retrofitting energy efficiency measures.

At this conference learn what Scottish local authorities and the Scottish Government are doing to encourage and enable energy efficiency retrofits, what the current and future policies are and how these will affect all buildings within Scotland. Hear about energy retrofitting projects throughout Scotland, the obstacles encountered and how these have been overcome. Technical experts will explain energy retrofitting from the both the supply (contractor) and demand (owner/tenant) side; what current solutions are available and how these can be implemented, with particular emphasis on mixed tenure blocks of flats. Explore the best methods of engagement throughout the retrofit process, the financial options and funding available as well as the tools currently available to aid the energy retrofit journey.

The conference will be in English

This conference is free of charge, but you need to register in advance.

## Accelerating Condominium Energy Retrofitting

10.00-10.30	<i>Welcome coffee</i>	
10.30-10.45	<i>Welcoming words</i>	Councillor , Aberdeen City Council Ian Turner – Project Manager, Energy Cities Mai Muhammad – Energy Manager, Aberdeen City Council
10.45-11.15	<i>Scottish Government energy policies</i> How current policy influences energy efficiency improvements  -future policy developments, their aims and objectives	TBC
11.15-11.45	<i>Energy retrofitting, Case Studies</i> Recent energy retrofit projects in around Scotland  Opportunities and barriers	Ian Smith – Changeworks
11.45-12.00	<i>Panel Discussion and Questions &amp; Answer session</i>	
12.00-12.10	<i>Break</i>	
12.10 – 12.40	<i>Deliver national, think local: establishing a high-quality, scalable supply chain to deliver across Scotland</i> Establishing supply chain for contractors delivering multiple energy efficiency measures	Nicola McLeod – Operations and supply chain Manager, Warmworks
12:40 – 13.10	<i>Energy Retrofit Engagement &amp; Funding Options</i> The engagement process for contractors and building owners/tenants  -Funding options	Thane Lawrie- Chief Executive, SCARF
13.10-13.20	<i>Panel Discussion and Questions &amp; Answer session</i>	
13.20-13.30	<i>Closing Remarks</i>	
13:30-14:30	<i>LUNCH AND NETWORKING</i>
