### Supporting a new Circular economy for Raw materials recovered from landfills

The Interreg North-West Europe Project is coordinated by SPAQuE and unites 8 partners from 4 EU regions.

# Making decisions about what & why?

# Facts & Figures: According to EU Landfill Mining Consortium EURELCO Europe has:

- 500.000 landfill sites
- 90% not operated according to current standards (non-sanitary landfills)

# Making decisions about what & why?

Landfilling : final waste disposal sites as the end of the line in a linear economy

Is this the end of story?

Risk based approach ( source – pathway – target ) : install a safe infinite containment

LfU

**COCOON Questionnaire** 

Guarding the status quo: is this static concept robust to environmental changes?

we are lucky people: there is quite a lot of room for improvement!

### Toxic waste sites flooded

At least 13 toxic waste sites in Texas were flooded or damaged by Hurricane Harvey, according to the Environmental Protection Agency. The agency announced Saturday that it had assessed 41 Superfund sites using aerial images, and determined the ones badly affected by the storm.

The impact of flooding on the sites is unknown. The EPA said its workers have not been able to "safely access the sites" but are ready to do so as soon as the floodwaters recede. In the Houston area, authorities had said it would take 10-15 days for floodwaters to recede.

At the Highlands Acid Pit on Thursday, August 31, 2017, the No Trespassing sign on the barbed-wire fence encircling the 3.3-acre Superfund site barely peeked above the churning flood water from the nearby San Jacinto River.

Final waste disposal versus stock of resources

TOGETHER WE MAKE TOMORROW MORE BEAUTIFUL

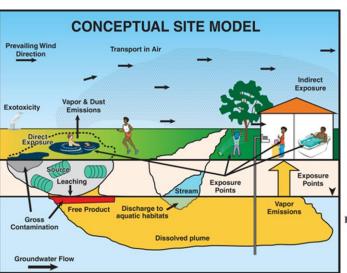

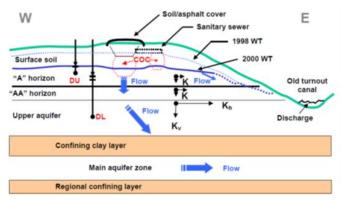

# Decision making and models Conceptual site models & Decision support tools

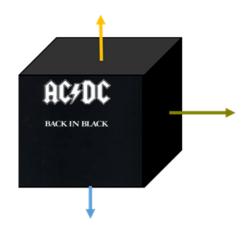

### SWOT of traditional CSM:

- > Strength: objective and straight forward evaluation of Landfills on large scale
- ▶ Weakness : CSM with strong emphasis on impact of Landfills at environment (black box)
- ▶ Opportunities : new focus on Landfills and more data available
- ▶ Threats : unfulfilled expectations and timeframes not respected (no interim use)

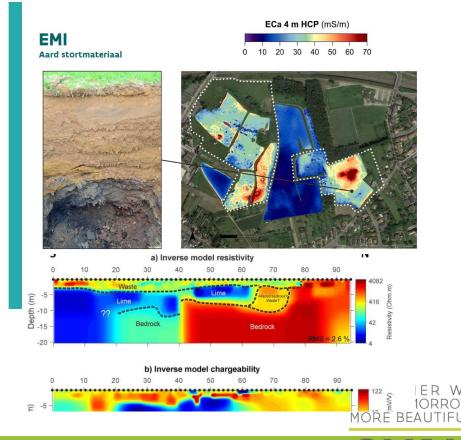

# Decision making and models Conceptual site models & Decision support tools

Soil exploration = boring?

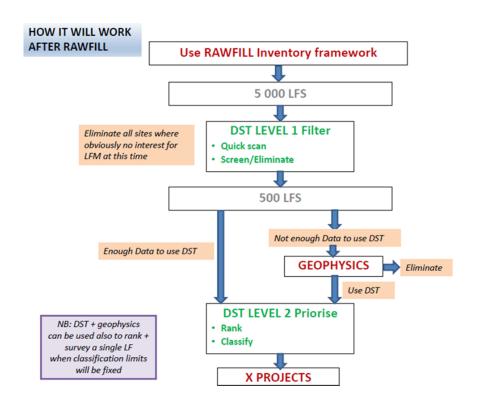

State of the Art

### **Tiered approach (2 steps)**

Servant Cedalion is leading the temporary blinded giant Orion to the light Eos.

- The metaphor of dwarfs standing on the shoulders of giants expresses the meaning of "discovering truth by building on previous discoveries".
- Isaac Newton in 1675: "If I have seen further it is by standing on the shoulders of Giants."

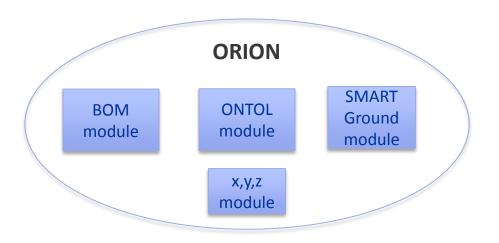

# Orion: connecting & delivering solutions

- Not reinventing but re-using & recycling already developed tools for similar conditions / sites
- Customizing those tools and combining them in the Dashboard of DST 2 Orion
