

ENERGYCITIES

# Procurement Guide for 4th Generation District Heating and Cooling

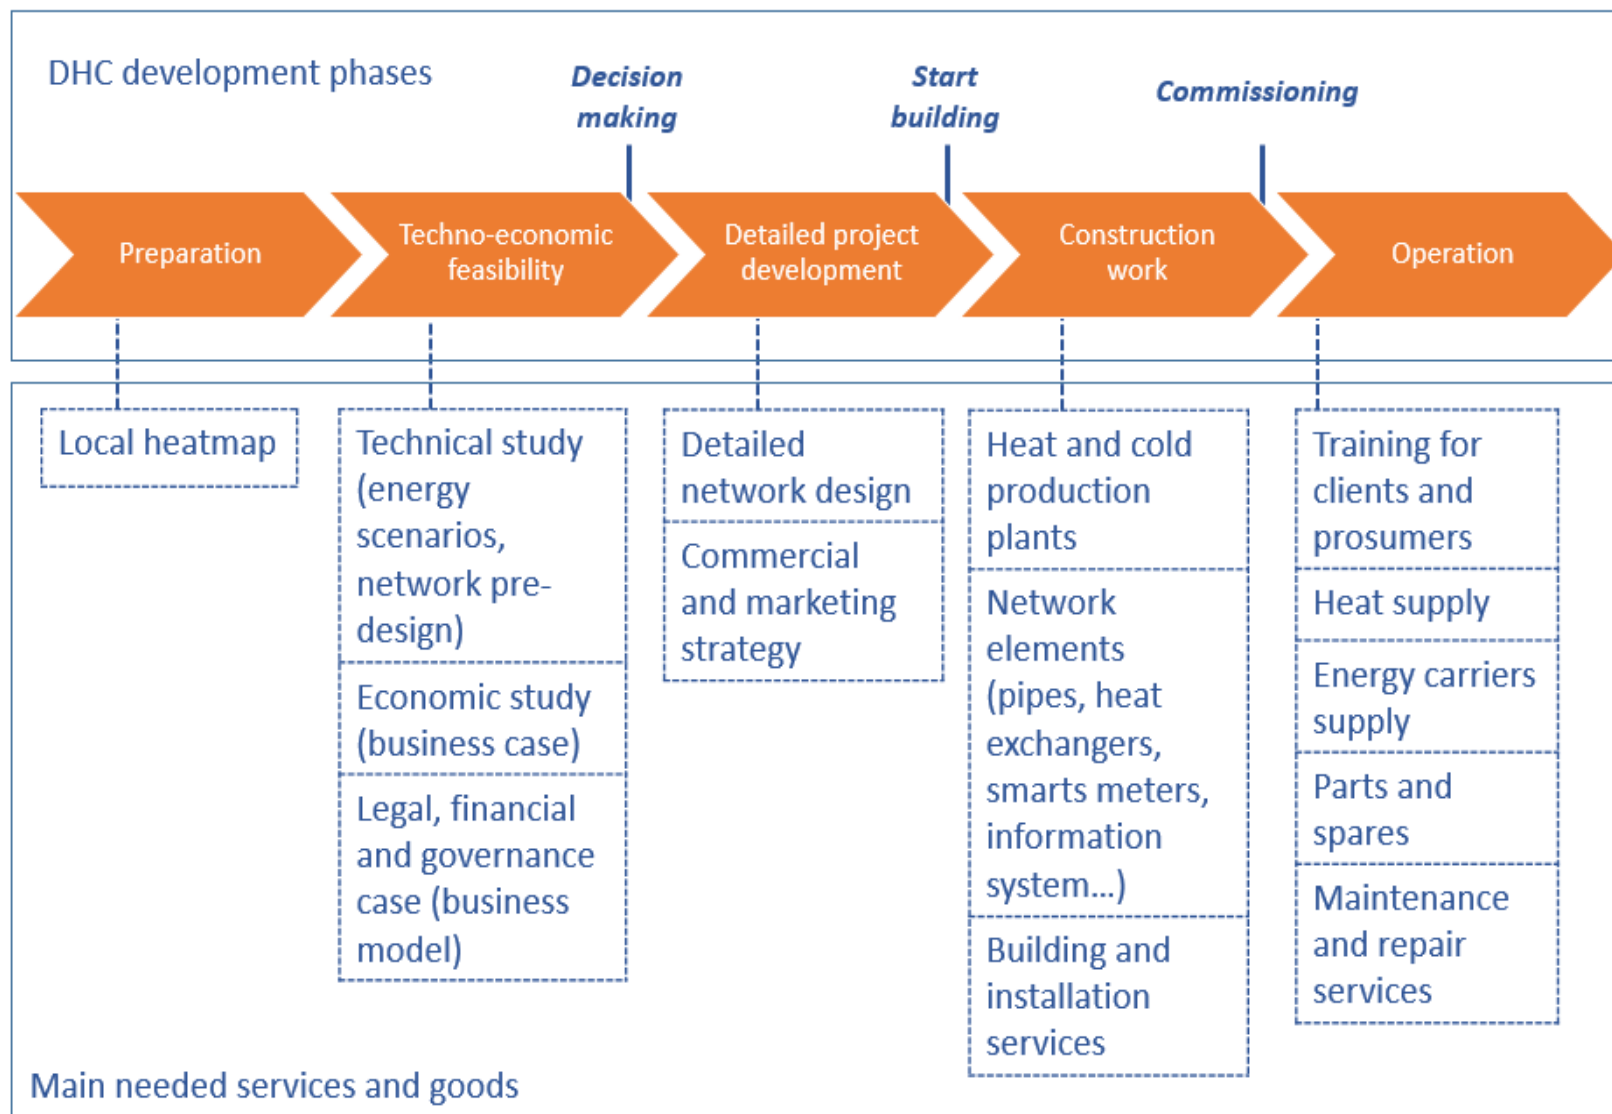

*Julien Joubert – Energy Cities – 09 Dec 2019*

# Main messages

1. Differentiate procurement steps and project development steps
2. Choose procurement procedures adapted to your business models and types of projects
3. Carefully identified the key goods and services you need for 4<sup>th</sup> DHC networks:
  - Local heat map
  - Techno-economic feasibility studies including legal, financial and governance case
  - Training for clients and prosumers
  - Heat supply

# Project development steps

# Procurement procedures

## Open Procedure (one step)

## Restricted Procedure (two steps)

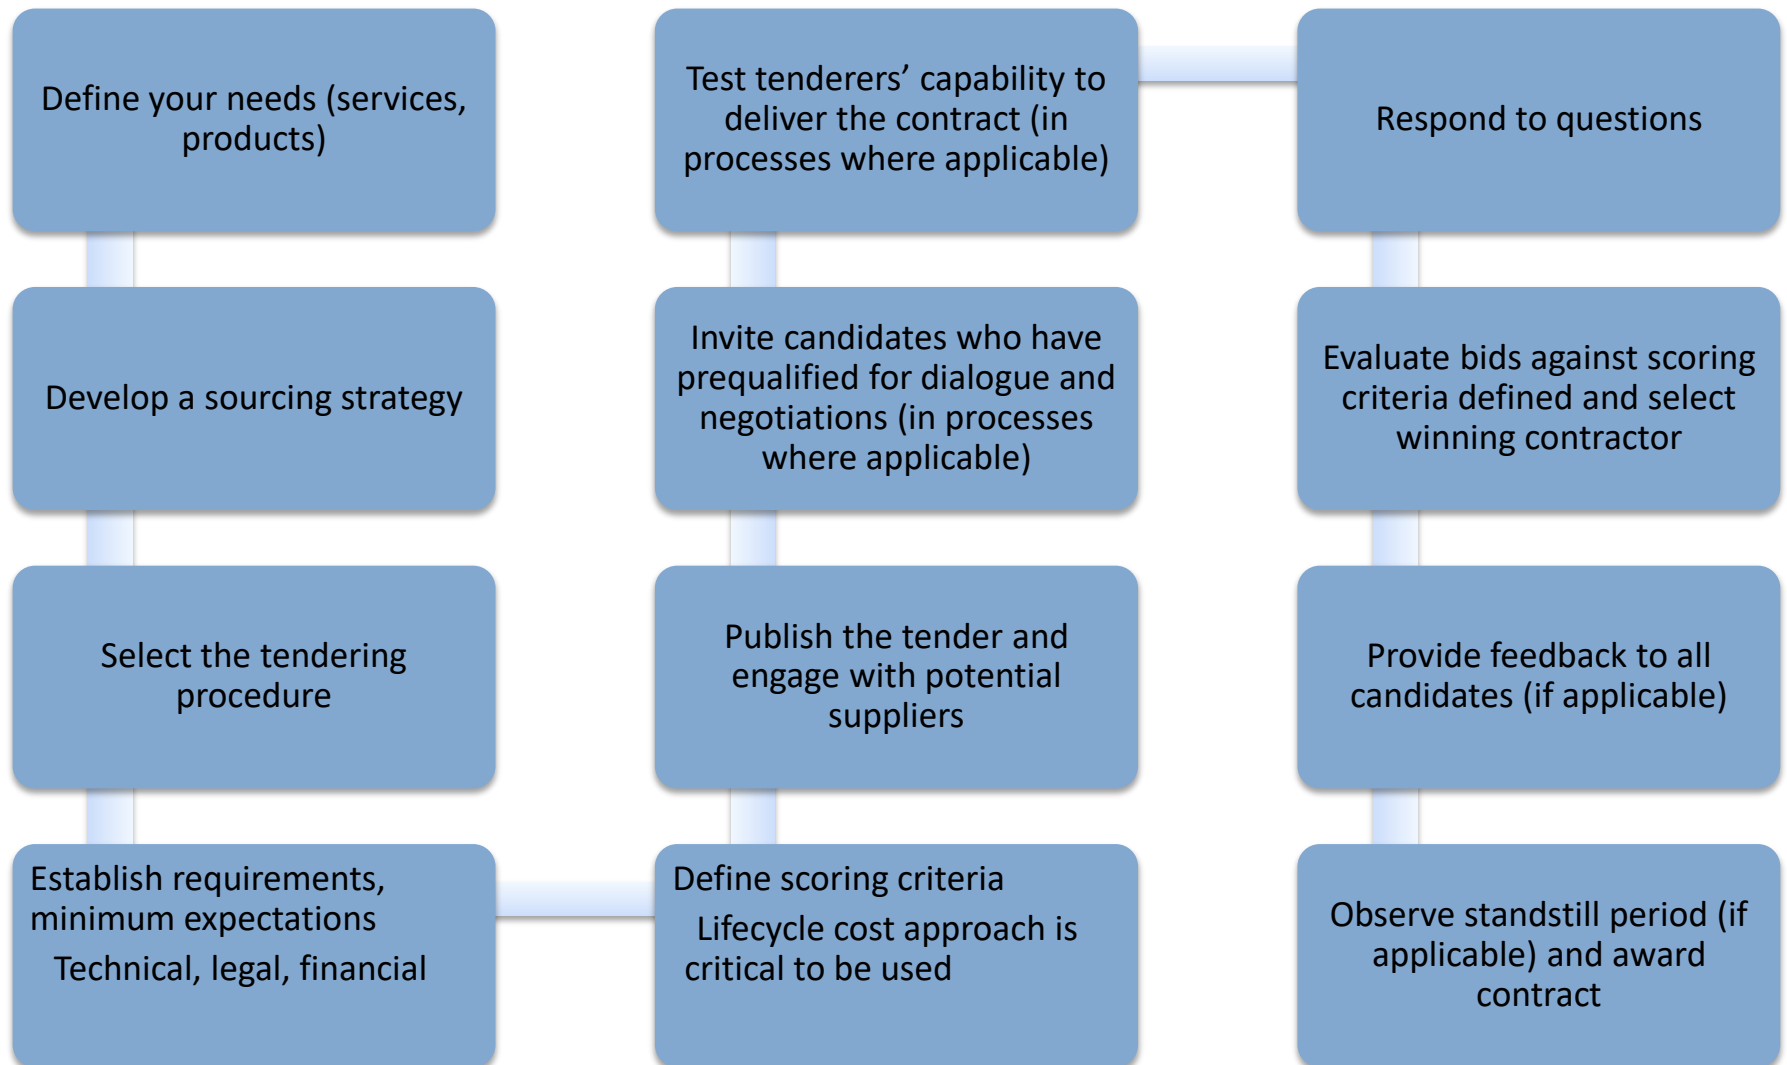

## Competitive Procedure with negotiation

## Competitive Dialogue

# Procurement steps

# Procurement strategies

- Project Team and Steering Committee
- Joint procurement
- Engaging Suppliers
- Risk management

*Schematic organisation of the usual market on the left and with a procurement association on the right*

# Local heat map

## Key success factors

- Identification heat sources
- Current and projected heat and cold consumption of buildings
- A lot of different data sources
- Breaking down organisational communication barriers

## Procurement procedure

Open or a restricted procedure usually

## Stakeholders' engagement

- Municipal departments (incl. energy, urban planning, facility managers...)
